

8 reasons to choose the CS 7200 - Neo Edition

1 Accurate and confident diagnoses
The CS 7200 delivers high resolution images (up to 19 lp/mm true resolution) in seconds for fast, confident diagnoses with nearly no risk of over- or underexposure.

"The CS 7200 fully meets my needs and workflow; it's very simple to use, with few buttons. Plus, it's small, compact and perfectly fits within the practice."

Dr. Pascal Zyman

2 Smarter workflow for greater efficiency

With Scan & Go and Smart Plate technologies, plates are pre-identified and images automatically routed to the correct computer and patient file, eliminating risk of plate mix-up.

2

3 As easy and comfortable as film
Thin, flexible plates with no cable are as easy to position as film and very comfortable for patients—without the cost and messiness associated with traditional methods.

Thin, flexible, cable-free

100% active surface

Rounded corners

4 Meet all your daily exams needs

Plates are available in the most common sizes—0, 1, 2—and cover periapical, bitewing and pediatric exams.

4

5 Durable, reusable plates
The durable plates can be reused hundreds of times and—when needed—replacements plates can be purchased in multiple sizes.

6 A cost-effective solution for any practice

The compact unit can be used chairside or shared between multiple operatories, making it a cost-effective solution for both small and large practices.

6

7 Powered by CS Imaging 8
Our imaging software connects all your dental imaging technologies into one single platform—the first step to an effective digital workflow.

8 Long-term peace of mind

To protect your investment, the CS 7200 offers an extended warranty* option, including parts replacement, offering you a long-term peace of mind.
